**For Facility Management Magazine**

## **Safety In Action Focus On Technology**

Safety In Action, to be held concurrently with Melbourne Materials Handling at the Melbourne Exhibition Centre on 17-19 April, will give facility managers and supervisors a most convenient and effective way to keep track of the latest aids to productivity.

In terms of waste management, for example, visitors to the Miltek stand can view a wide range of high quality compactors, which reduce the carbon footprint by turning cardboard, plastic, steel cans and EPS (polystyrene) into compressed waste bales. Miltek can convert the traditional waste disposal costs of businesses into income, by encouraging recycling.

Electrodrive, which develops custom engineered manual handling equipment to make the workplace safer, will display tugs, power trolleys, waste bin movers and ride-ons. It will also showcase motorised bed-movers that allow one person to effortlessly move heavy hospital beds.

These are just a sample of products and services that will be of interest to facility managers and others engaged in site management, plant management, maintenance, QA, production, OHS, risk, forklift management, warehousing, logistics and project management.

Visitors will also be able to network and learn from industry experts through a number of free industry knowledge centres.
