For Forklift Action – media release**

## **‘Must events’ to lift workplace productivity**

For a safe, productive forklift environment, it is imperative that management keeps up to date with the latest product innovations and OHS services.

They need look no further than The Safety Show Sydney and Sydney Materials Handling, to be held in conjunction with Bulkex, from 25-27 October at the Sydney Showground, Sydney Olympic Park.

These shows offer visitors a unique opportunity to find the latest OHS products all under one roof along with hundreds of new and innovative ways to improve workplace performance.

Safety is of special significance this year, with the harmonisation of OHS laws across State and Federal jurisdictions in full swing.

Products and services include legislation advisory organisations, health and safety management software, risk management tools, security and communication equipment, health and safety consultants, insurance products, medical and rehabilitation services, first aid, ergonomics and office safety, vehicle safety, hygiene services and equipment.

### **High visibility pallet racking**

For example, VisiPro will showcase a high visibility pallet racking upright protector, designed to reduce the damage resulting from impacts caused during loading of racking.

With superior rack protection properties at a third of the cost of existing market players, the VisiPro uses a simple clipping system to ensure fast installation, and has a narrow width so as to provide protection without reducing the clear entry of the pallet into the racking bay.

Injection molded from a high impact plastic compound that distributes the collision load to an internal energy absorbing pad, VisiPro is coloured in a high visibility fluoro yellow.

### **E-volution for a greener world**

In accordance with the theme ‘e-volution for a greener world’, Clark will present a series of extremely efficient 80-volt electric models. The electric GEX forklift, with pneumatic or super-elastic tyres and “built to last” design will make its

debut. The 80 Volt four-wheel forklift uses two drive motors, 100 per cent AC technology and maintenance-free oil immersed multiple-disc brakes.

Another energy-efficient newcomer to go on show will be the electric tow tractor CTX 40/70.

Hilton specialises in hard-wearing, high performance vacuum cleaners for tough work environments. Hilton's dual filtration system incorporating the latest cyclonic technologies was tested during the Christchurch earthquake cleanup where fine and difficult materials were encountered. It came through with flying colours.

The unique design provides maximum separation with minimal maintenance, using filter technology developed to remove radioactive dust from plant exhausts without redistribution.

### **New OHS environment**

Organisations must be prepared for the new OHS legislative environment, for the changes to processes and procedures, and for what and how information has to be recorded and reported.

Visitors to the ComOps stand will learn how Salvus, a comprehensive safety, risk and claims management system can help by efficiently managing safety processes, mitigating risk, cutting costs and ensuring compliance with legislation, while proactively protecting and driving the business.

Imagine giving someone the title of OHS manager without training in environmental responsibilities? Absorb Environmental Solutions is a leading provider of environmental training, products and services. It supplies spill response products from basic spill kits to silt control devices, along with advice to meet every need.

### **Safety posters**

Visitors to the Poster Faktory Australia stand will find a unique service, in which posters are supplied and maintained through a dynamic poster exchange system. The posters, catalogued in an extensive library, cover a broad range of issues relating to health, safety and the environment.

Special front-loading, anodized frames are positioned strategically across an organisation's site. Once the frames are installed the posters are changed every six weeks and charged for on an annual fee basis. A free design and print service prepares messages to theme specifications.

**Australian  
EXHIBITIONS  
& Conferences**

Organised by: Australian Exhibitions & Conferences Pty Ltd  
Level 5, 267 Collins Street, Melbourne, VIC, 3000, Tel 03 9654 7773 Fax 03 9654 5596
