

Leda to Showcase Insulated Dock Levellers

Insulated dock levellers that insulate heat and cold at loading dock areas will be the feature of the Leda Security Products Pty Ltd stand at The Safety Show Sydney.

The Insulated dock leveller allows refrigerated warehouses and distribution centres to save money on cooling while having tough, safe and reliable dock products installed. Leda distributes dock products by Crawford, the world's largest manufacturer.

Studies made by the Institute of Thermodynamics at Hanover University show that the Crawford Insulated dock leveller (624 isodock), when compared to conventional docking systems, provides energy savings of up to 75 per cent of the annual average energy cost of a detached home.

Other products on the stand will be high-speed doors, insulated panel lift doors, and mechanical and pneumatic dock shelters. Leda also provides gates, boom gates, barriers and bollards for industrial properties across Australia.
